Udyam Digital

From first question to a live connection in one sitting, on a phone, in Hindi or English

Business case · Enterprise Track A · Accel Business

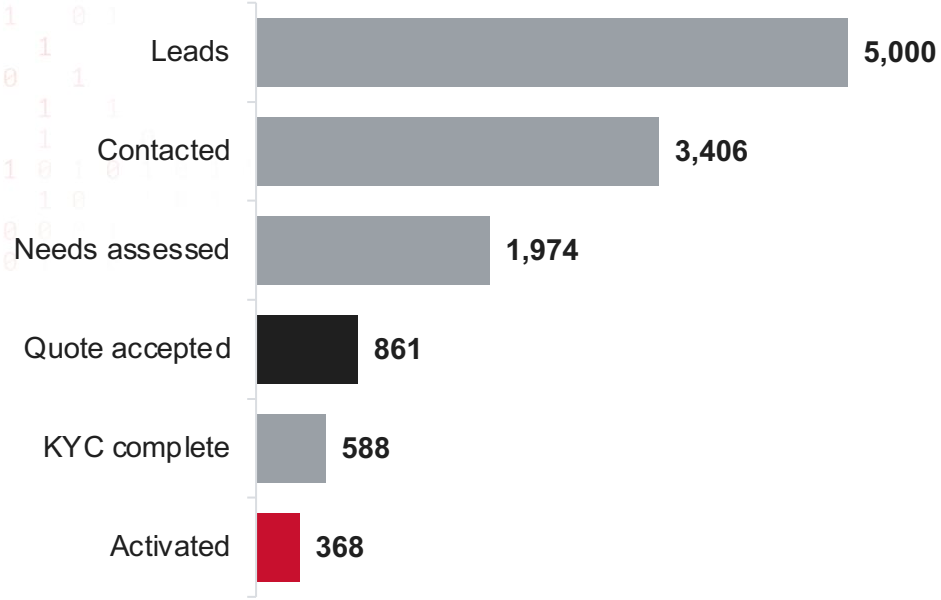

Live prototype:
udyam-digital-779328647112.asia-south1.run.app

Platform Partner unstop

Only 368 of 5,000 leads became customers

The steepest drop is between needs assessed and quote accepted: only 44% go on

7.4%
of leads activate

17.6
days from lead to live

₹15,053
acquisition cost per activation

3.0
status calls per customer

Source: smb_leads.csv (synthetic), 5,000 leads, Apr–Jun 2026.

Offices first, micro retail for volume

Four segments in the lead data, each with its own starting bundle and sales route

Start here

Professional offices

25% of leads

11.1%

activate

₹6,575 bundle a month

14% churn in 6 months

Digital first

Micro retail

54% of leads

4.1%

activate

₹2,470 bundle a month

23% churn in 6 months

Links + partners

Multi-site

15% of leads

11.0%

activate

₹28,080 bundle a month

11% churn in 6 months

Field visit

Manufacturers

6% of leads

12.8%

activate

₹15,910 bundle a month

8% churn in 6 months

Field visit

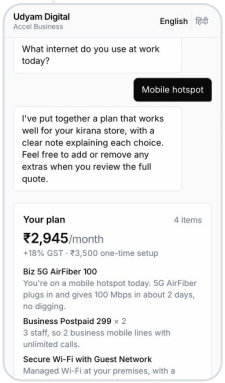

GSTIN holders activate at 9.6%, others at 2.0%, so the journey checks GSTIN early.

Source: smb_leads.csv (synthetic), 5,000 leads, Apr–Jun 2026.

One sitting on a phone: ask, quote, verify, track

Each step removes a reason owners drop out today

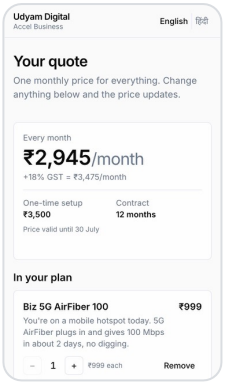

1 Ask

Chat or speak, English or Hindi. Asks only what's missing.

Fixes: No time for a visit (531)

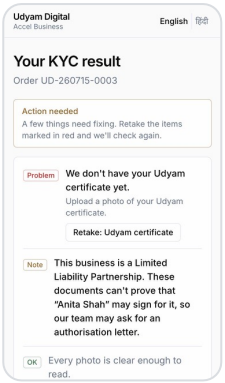

2 Quote

One monthly price with GST, a reason per item, add-ons on or off.

Fixes: Quote too complex or slow (385)

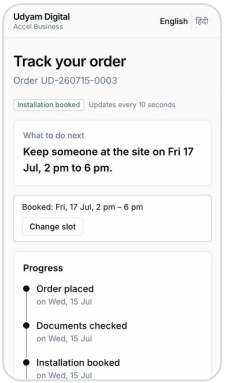

3 Smart KYC

Four photos checked in seconds, with a hint for each retake.

Fixes: Paperwork and documents (273)

4 Track

Order ID + PIN, self-booked install slot, ETA per item.

Fixes: 3 status calls per customer

Drop counts from smb_leads.csv (synthetic). Screens from the live prototype with sample data.

Rules set every price; the LLM only talks

So an AI mistake can never put a wrong product or price in front of an owner

Owner

speaks or types about the business, in Hindi or English

LLM listens

pulls out profile fields; sees the business description only

Rules decide

eligibility (tier, size, GSTIN, dependencies) and price, from the catalogue

LLM explains

puts the engine's quote in plain words; can't add a product or change a price

Never stuck

Groq, then Gemini, then rules-only mode. If both LLMs time out, the owner still gets a quote.

Private by design

The LLM never receives IDs, phone numbers, documents or photos.

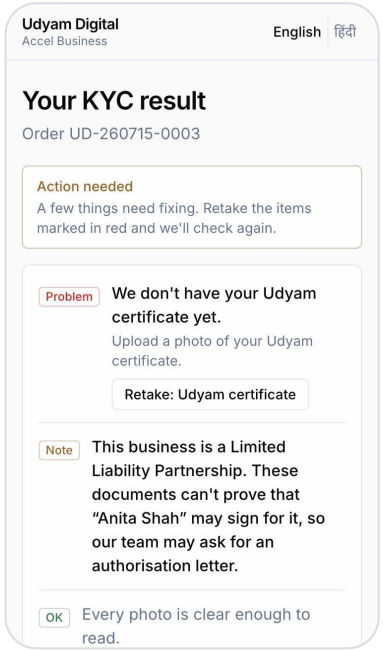

A person when needed

One tap hands the chat to the back office, with the conversation so far.

Advisor scenarios run against rules-only mode in tests; unit tests never call a real LLM.

KYC in seconds, built for the DPDP Act

Four photos in, a clear verdict out, and a precise hint when one photo needs a retake

1. **Consent**
   Per purpose, versioned, in English or Hindi. Withdrawing deletes the KYC data.
2. **Four photos, read in memory**
   GST and Udyam certificates, signatory ID, a recent bill. Never stored.
3. **Cross-checked**
   GSTIN checksum and registry status, Udyam match, names, bill within 90 days.
4. **A verdict**
   Verified, action required (retake one photo), manual review, or rejected.

No Aadhaar
never collected

No images kept
masked fields only

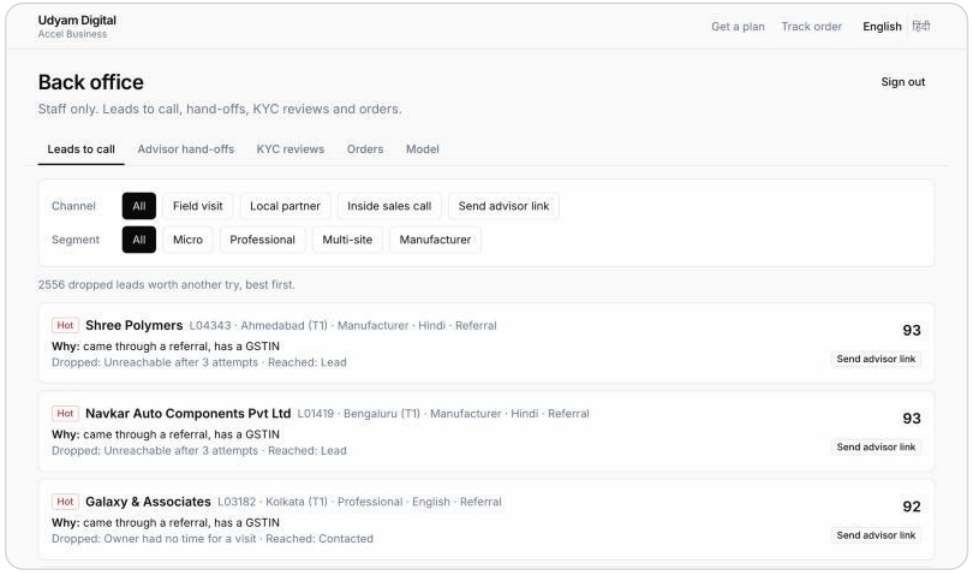

180 days
retention after go-live

Sample applicants K01–K12 are the case pack's synthetic documents; all 12 verdicts match in our tests.

Platform Partner unstop

Field reps and partners get the leads worth a visit

Every lead the advisor didn't close gets a score and a suggested channel

Back office: dropped leads ranked by score, with the reasons

Field visit

Multi-site and manufacturers: 11.0% and 12.8% activation, ₹28,080 and ₹15,910 bundles.

Local partner

Tier-2 cities, Hindi-first and micro owners. Same app in assisted mode, commission per sale.

Advisor link

1,124 unreachable or wrong-number leads get an SMS or WhatsApp link and start alone.

Lead score: AUC 0.73 on unseen June leads; the top 10% activate 2.1× as often.

Source: smb_leads.csv (synthetic), 5,000 leads, Apr–Jun 2026.

Five numbers the pilot has to move

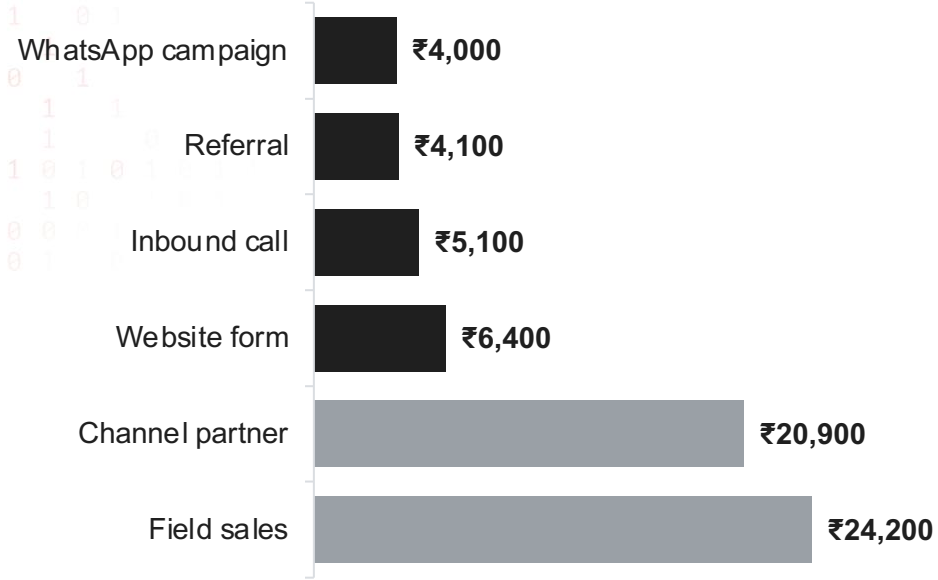

Baselines are from the lead data; targets are assumptions for the pilot to prove

	Today	Pilot target	What moves it
Lead → activation	7.4%	**12%**	Advisor, instant quote, self-serve link
Time to activate	17.6 days	**≤ 7 days**	Quote and KYC in one sitting, self-booked slot
Cost per activation	₹15,053	**≤ ₹8,000**	Fewer visits, each one where value is highest
Status calls per customer	3.0	**≤ 0.5**	Tracker with ETAs, no need to call
6-month churn	~15%	**≤ 10%**	Only bundles the business is eligible for

Source: smb_leads.csv (synthetic), 5,000 leads, Apr–Jun 2026. Targets are proposed, not measured.

Digital sources already win on cost per customer

Lead cost per activation by source, and what the targets would be worth

~600

activations a quarter from the same 5,000 leads, instead of 368 (at 12%)

~₹7,000

saved per activation if cost falls from ₹15,053 to ₹8,000

Months of revenue to recover the cost

Professional offices	2.3 →	**1.2**
Micro retail	6.1 →	**3.2**

Cost per lead ÷ activation rate (lead cost only; blended full cost is ₹15,053). Revenue, not margin. Projections are assumptions.

An 8-week pilot, with the risks designed in

Delhi and Mumbai (tier 1), Indore and Lucknow (tier 2, Hindi-first)

Weeks 1–2 · Set up

Connect the catalogue and registries. Train partners on assisted mode.

Weeks 3–6 · Run

Offices go digital first; micro retail via links and partners; field takes multi-site.

Weeks 7–8 · Read out

Compare with matched cities on the five numbers. Go or no-go.

Risk	How the design handles it
LLM gives a wrong answer	Rules set products and prices; rules-only fallback; human handoff
OCR misreads a document	Quality checks, one-photo retake hints, manual review queue
Field and partners push back	They get the high-value leads, plus commission on assisted sales
Personal data exposure	Consent per purpose, no stored images, masking, encrypted phone
Installs miss the date	Slots only from real capacity; delays shown, not hidden

Pilot cities are a proposal. Lead volumes per city are in smb_leads.csv (synthetic).
